

PSAM 9

Ninth International Probabilistic Safety Assessment and Management Conference

An IAPSAM Conference

Scope of the Conference

The purpose of the Conference is to provide a forum for presentation of innovative methods and relevant applications of system-based approaches related to the use of risk assessment and management for facilities, operations and processes.

Major Technical Disciplines and Application Areas

Aviation and Space
Biotechnology and Medical
Chemical and Processing Industry
Civil Engineering and Structures
Energy Generation and Distribution
Enterprise/Business Risk Management
Fire Engineering and Risk Assessment
Industrial Safety and Accident Analysis
IT and Telecommunications
Manufacturing and Mechanical Systems
Marine and Naval Architecture
Nanotechnology
Natural Hazards and Phenomena Modeling

Nuclear Systems
PSA/QRA Applications
Risk Management and Decision Making
Risk-Informed Policy and Regulations
Risk Perception and Communication
Safety Culture and Organizational Factors
Security and Defense
Software Reliability and Data Analysis
Structural Reliability Methods
Transportation Systems
Waste Management
... And Other Areas Not Listed Above

Pre-Conference Workshop

A Pre-Conference Workshop will be held on 15-16 May 2008 in Taipei, Taiwan, R.O.C., to introduce the concepts and tools commonly used in safety assessment and management, together with practical examples to illustrate their applications in safety critical engineering systems.
