

JEROME LONCHAMPT

PSAM12 Speaker Bio

Research Engineer

Short Statement: Co-author with Karine Fessart

BIOGRAPHY

Jérôme Lonchamp graduated from the National Superior School for Advanced Techniques (ENSTA) and has been working in the field of engineering asset management for the past 15 years in EDF R&D division. The methods and tools he has developed for EDF have been used for different kinds of power generating assets (hydro, thermal, nuclear...) and different companies (EDF, EnBW, CENG...).

The present work took place in the frame of an EDF R&D project, managed by his co-author Karine Fessart, aiming to develop the new generation of asset management tools. It also was a successful collaboration with EPRI ILCM project.
