Challenges With Risk and Vulnerability Analyses: Strategies For Integration In Risk and Crisis Management

Short Statement: One of the authors

BIOGRAPHY

Kerstin Eriksson is a Postdoc at the Division of Risk Management and Societa Safety, Lund University, Sweden. She holds a PhD in Engineering from Lund University. Her research areas of interest are within the fields of crisis management and risk governance. Her research focuses on how to shape crisis or disaster preparedness planning processes at the organisational level to enhance the ability to respond to crises as well as on resilience engineering. In addition she also does research on how organisations work with risk analyses, crisis management exercises and crisis management evaluations. Her research is associated with the Centre for Societal Resilience and Lund University Centre for Risk Assessment and Management (LUCRAM).
